

# February 2017 Meet Up Conference Call

## "Innovative Israel and STEAM Program for Jewish Preschools"

Hosted by: Jessica Yaira Gordon

Join us as host **Jessica Yaira Gordon** shares an innovative opportunity for Jewish preschools to explore STEAM careers and Israel.

Do your students like to tinker, build, and explore? Looking for a new, innovative way to teach about Israel?

This webinar will introduce a new program for Jewish preschools, called Discovering Israel through STEAM Careers (DISC). DISC is a hands-on, play-based program that teaches preschoolers about STEAM (science, technology, engineering, art, and math) careers in Israel, like an engineer in Tel Aviv or a marine biologist in Eilat. DISC provides teachers with resources and tools to bring STEAM into their classrooms and share the new and exciting innovations happening in Israel. With over 30 schools across the U.S. already implementing the program, we are excited to share this new opportunity with ECE-RJ schools.

### ***About the Creators:***

***Allison Bischoff and Jessica Yaira Gordon are passionate educators who are committed to bringing affordable and innovative programs and tools to Jewish preschools. We currently live in St. Louis and are excited to work with schools across the country!***
